NEWS from the CYTO Lab

Our recommendation for you: Sampling with Szalay Spatula

Dear colleagues,

The most important element in cervix cytology is correct sampling of the material. Apart from inspection and cleaning of the cervix, the choice of the right sampling equipment is also of great importance.

We recommend the Szalay Spatula, which is available in three different sizes and can be obtained free of charge from us, as you are one of those who use our CYTO Lab services.

The enormous benefit of the Szalay Spatula

It is very efficient and economic to use. You require no other aids for sampling. The special shape and surface of the Szalay Spatula makes it possible for you to obtain ample and well preserved cell material from all zones of the Cervix uteri in one procedure. The criterion is the correct use of the spatula.

Please have a look at the video "Correct Pap smear sampling" on our Homepage, Link: <http://www.cytologie.ch/index.php?id=174#c323>. Also take note of the enclosed flyer.

Please contact me personally at any time if you have any queries.

Yours faithfully
